# How to replace the battery in Beam 4.0

STEP 1.
Unlock the battery lid
• Slide the small locking mechanism to the unlocked position.

STEP 2.
### Gently pull open the lid
• To ensure full IP66 waterproofing, the lid is very tight due to the silicone seal.
• If necessary use a blunt prying tool to tip open the lid.

STEP 3.
### Remove the battery by gently knocking the beam into your hand
• Recycle the old battery properly either by returning it to Flowplan® or following your local recycling procedure.

flowplan

STEP 4.
Insert the new battery
• Ensure the right polarity by matching **+** and **–** icons on the Beam and the battery.
 • Only use batteries supplied by Flowplan, as other batteries may not work properly.

STEP 5.
Put the lid back on
1. Slide the top end in.
2. Press the lid down.

STEP 6.
Slide the locking mechanism back to the locked position
• Remember to change battery in the Flowplan® Backoffice or Flowplan® Fieldoffice app.
