Safe to use

Discover our wide range of top-tier security solutions tailored to safeguard assets and peace of mind for your customers. From cutting-edge surveillance systems to advanced video surveillance, Safetify provides the tools you need to protect what matters most.

Elevate your security business with Safetify today.

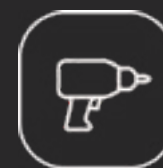

- Steffen Bjerregaard, CEO

Safetify[®]

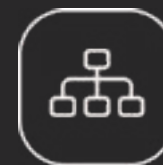

Why choose Safetify?

Because serious security is what we do and here is why that matters to you as an installer.

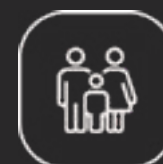

Easy and time-efficient installation and setup.

Complete overview of end-user's systems for easy checkup and error support.

Specially designed packaging for easy unpacking of devices and one-stop disposal.

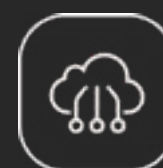

Very easy end-user operation of the system reducing after-installation contact from end-user.

Easy setup to professional alarm centers via the SIA DC-09 communication protocol.

Dedicated and European based installer support.

Our proprietary IoT infrastructure management system Odin ensures encredibly stable operation, very fast response times and secure communication.

Security System

Certified protection against intrusion, fire,
water damage.

Effective Protection

Serious protection made real easy to manage.

Our security system features

Mobile Backup

The Safetify alarm system connects to the internet, either via wireless Wi-Fi or wired LAN. By also inserting a SIM card into the alarm, you open up the possibility of sending SMS notifications to individuals who don't have the app installed on their phones, such as neighbors. Additionally, you have a backup in case your internet goes down. In this scenario, the system will automatically continue to operate using the SIM card.

Sensor Live Status

With the Safetify alarm system, we introduce live status updates for your most frequently used sensors, such as contact sensors and motion sensors. You will now be alerted if you arm the alarm system and a door or window is left open. In the app, you can also see at any time which doors and windows are open and which are closed, as well as the sensor's battery status.

QR Connect

With QR Connect, it has never been easier to connect new sensors and accessories to the system. All you need to do is scan the product with the app on your phone. Setting up a new device only takes a few moments.

Light Control

With the Safetify alarm, you can easily control the lighting in your home, and you can even set the lights to turn on and off based on whether the alarm is armed or disarmed. With our SmartPlug, you can even integrate your existing lamps by simply plugging the SmartPlug between the outlet and the lamp.

Pet-Friendly

Our motion sensors are designed to ignore pets up to approximately 25 kg, but they will still react to humans. In homes with a larger breed of dog, we recommend securing with contact sensors and vibration sensors instead.

Video Surveillance

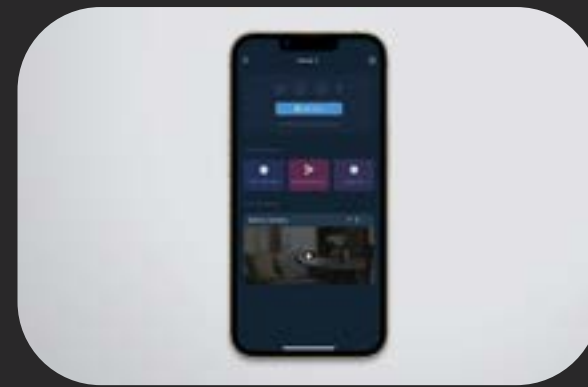

The Safetify alarm system offers deep integration with our battery and solar-powered cameras. Easily access your surveillance cameras directly from the app's front page, and if you have more than one camera, you can even consolidate up to four of them on a single screen for a comprehensive overview. Through the app, you can easily control your cameras, customize settings, and view your recordings.

Unlimited Users

You can add as many users to the Safetify system as you desire. If you have inserted a SIM card, you can even choose whether a user should receive notifications as push messages, SMS messages, or both.

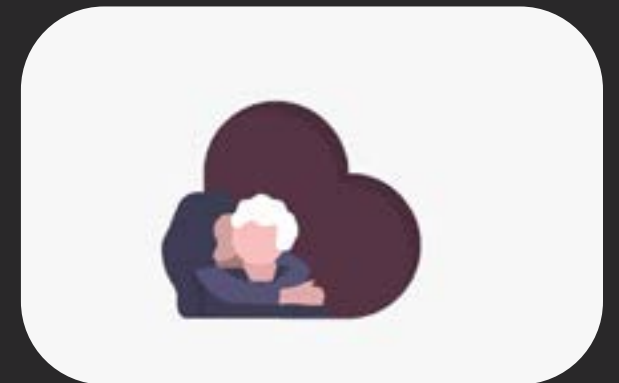

App Control

The Safetify alarm system is easily set up and operated through our app for both iOS® and Android™. You have your alarm system in your pocket, allowing you to check the alarm, video surveillance, and lighting control no matter where you are.

Care Mode

The Safetify system introduces our care feature for the elderly and vulnerable. With Care Mode, you can set up the sensors to monitor for activity in the home of the elderly or sick individual. If the sensors haven't detected activity within a specified timeframe, you will be alerted, allowing you to quickly and effectively check if something is amiss.

Dedicated Installer Features

No end user would ever be secure without you the installer and therefore we work hard on making the Safetify alarm system the first choice for installers. We have made the Safetify alarm system very easy and time-efficient to install and made it very easy to monitor and access end-user's systems for checkup and error support.

Professional CMS connection

The Safetify system connects directly to professional alarm centers via the SIA DC-09 communication protocol, with data encryption.

Elevate Your Security Inventory

Upgrade Your Defense. Top Accessories to Bolster Your Alarm System

Key Fob

Smart and practical key fob for operating the alarm system from a distance.

Included

1 x Key Fob
1 x CR2032 battery (pre installed)

Product IDs

SKU: SFRMT
EAN: 5711826605045

Technical Specifications

Battery: 1 x CR2032
Battery life: Up to 18 months
Environment: Indoor, -10°C to +50°C, up to 95% relative humidity (non-condensing).
Dimensions: H: 27 mm, W: 27 mm, D: 3 mm

Convenient and Lightweight

The key fob is roughly the same size as the one you're familiar with from your car and weighs next to nothing, making it an ideal candidate for attaching to your key-chain.

Easy Operation

The key fob functions just like your car key, allowing you to fully arm, partially arm, or disarm the alarm system. Additionally, the key fob features a dedicated SOS button, which you can hold to manually trigger the alarm in case of emergencies, as well as a Smart Home button for controlling Smart Plug and Smart Bulb devices.

Keypad

The keypad allows you to operate the alarm system with the use of a 4 digit access PIN code or key tags.

Included

- 1 x Keypad
- 1 x Charger
- 1 x Screws and wall anchors for installation

Product IDs

SKU: SFPAD
EAN: 5711826605052

Technical Specifications

- Battery: Built-in 800 mAh 3.7V rechargeable Li battery
- Battery life: Up to 12 months (by 8 daily activations)
- Charging time: 2.5 hours
- Key tag reader: RFID 125 kHz
- Environment: Indoor, -10°C to +50°C, up to 90% relative humidity (non-condensing).
- Dimensions: H: 145 mm, W: 92 mm, D: 21 mm
- Features: Low battery notifications, key tag reader, LED status bar

Change Modes

Transition between the system's three modes: Armed, Home Mode, and Disarmed. You can switch modes either by entering your personal access PIN code or by simply presenting a key tag to the keypad. The real-time status of your alarm system is displayed in the keypad's status bar.

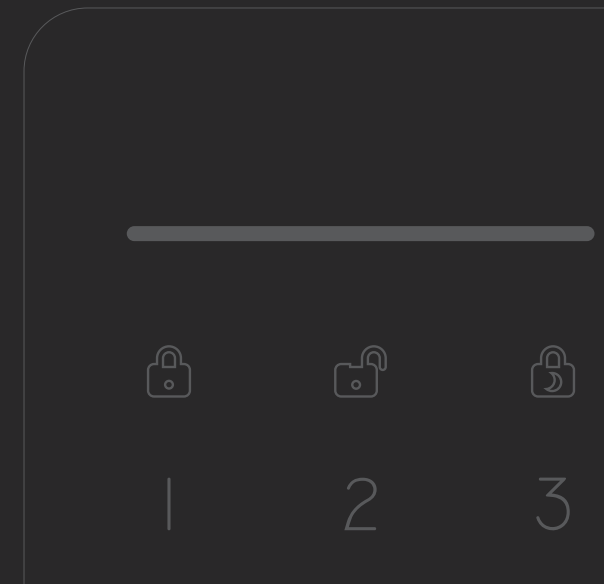

Smart Control

The keypad allows you to arm and disarm the system using touch-sensitive buttons or simply by placing a key tag on it. The keypad displays the current status of your alarm system in the illuminated status bar.

Smart Control

The keypad is completely wireless and can be installed indoors wherever you desire. Thanks to its intelligent power-saving feature, the keypad can operate for a minimum of 12 months before requiring a recharge. The keypad wirelessly connects to alarm system, offering you the ability to control the system without relying on your mobile phone.

Contact Sensor

Securing doors and windows, both when you are home and away.

Included

- 1 x Contact Sensor
- 1 x CR123A battery (pre installed)
- 1 x Screws and wall anchors for installation

Technical Specifications

- Battery: 1 x CR123A
- Battery life: Up to 18 months
- Environment: Indoor, -10°C to +50°C, up to 90% relative humidity (non-condensing).
- Dimensions: H: 84 mm, W: 26 mm, D: 22 mm / Magnet H: 34 mm, W: 11 mm, D: 9 mm
- Features: Low battery notifications, live-status in the app, closing warning

Product IDs

- SKU: SFDWC
- EAN: 5711826605069

Compact and Wireless

The contact sensor consists of two components: one is mounted on the frame, and the other on the door or window itself. When the door or window is closed, the magnetic field between the two parts of the sensor is maintained. However, if the door or window is opened, the magnetic field is disrupted, triggering the alarm.

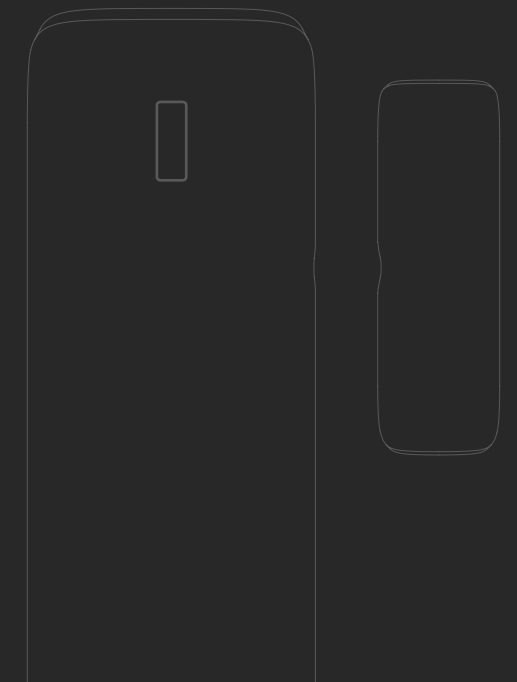

Security When Home

The wireless contact sensor triggers the alarm when a door or window is opened. Contact sensors are excellent for securing the outer perimeter of your home, enabling you to activate the alarm even when you are inside, such as during the night.

Perfect for Homes with Pets

Contact sensors are also the ideal solution for securing homes with larger dogs or high-jumping cats, that might trigger motion sensors.

Extensive Coverage

The motion sensor emits an array of invisible passive infrared beams in front of it. This array is projected in a 110-degree angle and extends approximately 9 meters from the sensor, providing substantial coverage. When a person moves within this area, the sensor detects the motion and triggers the alarm.

Pet-Friendly

The motion sensor is pet-immune for animals up to approximately 25 kg but will activate the alarm if a person moves within its field of vision. If you have a large dog, consider using contact sensors instead.

Motion Sensor

Wireless Infrared Motion Sensor that monitors and detects movement within its field of vision.

Included

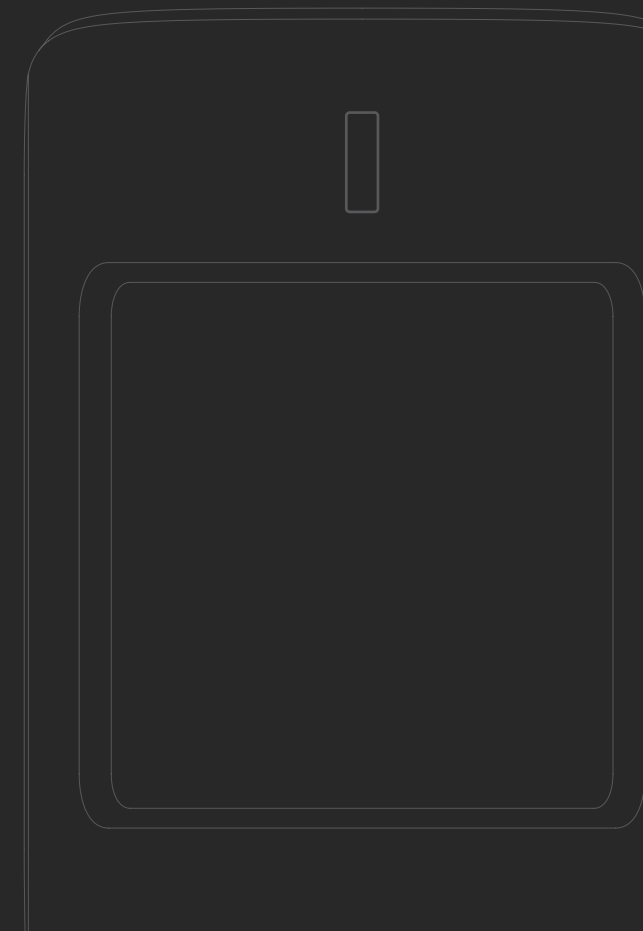

1 x Motion Sensor
2 x AA batteries (pre installed)
1 x Screws and wall anchors for installation

Product IDs

SKU: SFPIR
EAN: 5711826605076

Technical Specifications

Battery: 2 x AA
Battery life: Up to 18 months
Environment: Indoor, -10°C to +50°C, up to 90% relative humidity (non-condensing).
Dimensions: H: 100 mm, W: 60 mm, D: 48 mm
Features: Low battery notifications, 110° field of view, 9 meters infrared range

Vibration Sensor

Wireless Vibration Sensor that detects vibrations in the object it is mounted on.

Included

- 1 x Vibration Sensor
- 1 x CR123A battery (pre installed)
- 1 x Double-sided adhesive tape for installation

Product IDs

SKU: SFVBR
EAN: 5711826605083

Technical Specifications

- Battery: 1 x CR123A
- Battery life: Up to 18 months
- Environment: Indoor, -10°C to +50°C, up to 90% relative humidity (non-condensing).
- Dimensions: H: 84 mm, W: 26 mm, D: 22 mm
- Features: Low battery notifications

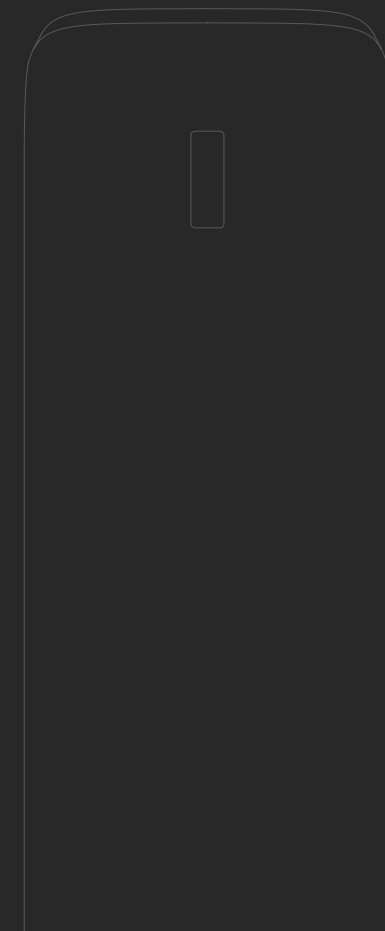

Mount on Virtually Anything

We recommend installing a vibration sensor on windows that are vulnerable to tampering and on larger valuable items that should remain stationary, such as ceiling-mounted TV projectors, IT equipment, and more.

No-Nonsense Burglar Deterrent

The vibration sensor is particularly suitable for windows that are easy to tamper with, large windows, as well as for securing valuable assets such as IT equipment, video projectors, safes, and more.

Instant Notification

If the wireless water sensor detects liquid, you and the individuals you've selected will instantly receive a message directly on your phones.

Prevent Water Damage

We recommend installing a water sensor in all rooms below ground level and near your washing machine and dishwasher, as water damage most frequently occurs in these areas.

Water Sensor

Receive instant notifications if the basement starts flooding or the dishwasher leaks water.

Included

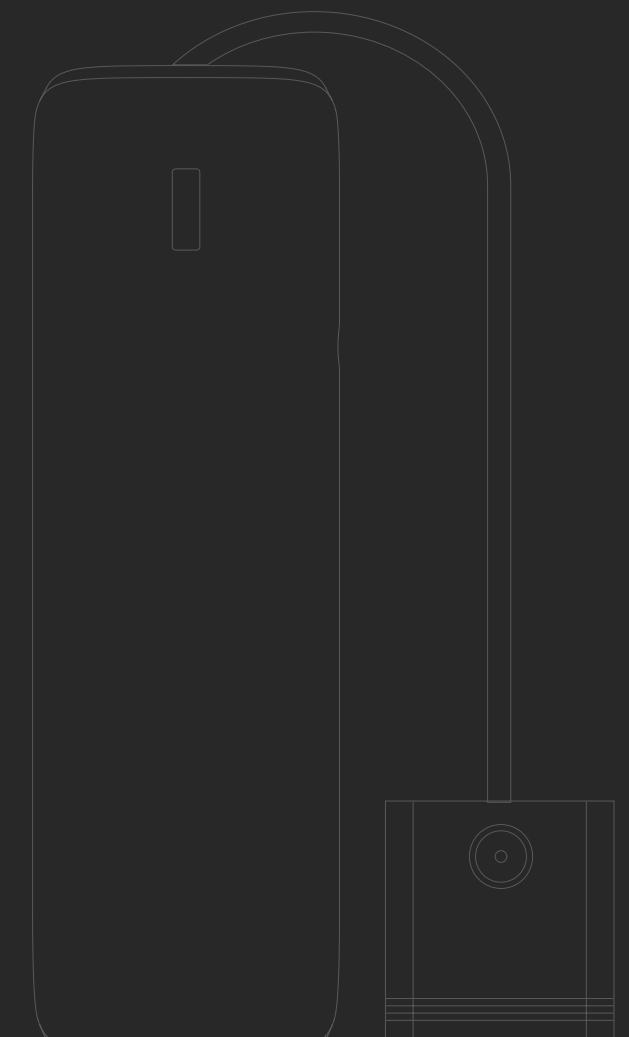

- 1x Water Sensor
- 1x AAA battery (pre installed)
- 1x Screws and wall anchors for installation

Product IDs

SKU: SFWAT
 EAN: 5711826605090

Technical Specifications

- Battery: 1 x AAA
- Battery life: Up to 18 months
- Environment: Indoor, -10°C to +50°C, up to 90% relative humidity (non-condensing).
- Dimensions: H: 80 mm, W: 38 mm, D: 13 mm
- Features: Low battery notifications

Get Alerted, Even When You're Away

If smoke particles are detected, the smoke alarm will transmit a wireless signal to your alarm system to activate the alarm, along with all connected sirens. Simultaneously, notifications are sent to the individuals you have selected within the app regarding the incident.

Easily Secure Your Entire Home

We strongly recommend installing a smoke alarm in every bedroom of your residence. For added safety, you can also place a smoke alarm in other high-risk areas within your home, such as the kitchen, office, garage, storage rooms, and more.

Smoke Sensor

Wireless Optical Smoke Alarm that triggers your alarm system and all connected sirens in the event of smoke development.

Included

1 x Smoke Sensor
1 x 9V battery (pre installed)
1 x Screws and wall anchors for installation

Product IDs

SKU: SFSMK
EAN: 5711826605106

Technical Specifications

Battery: 1 x 9V
Battery life: Up to 18 months
Environment: Indoor, 0°C to +50°C, up to 90% relative humidity (non-condensing).
Dimensions: Ø: 107 mm, D: 34 mm
Features: Low battery notifications, 85 dB @ 30 cm volume, 20 m2 surveillance area, test function, automatic restart after alarm.

Remote Control Your Home's Lighting

Turn on the lights before you unlock your home to avoid entering dark rooms upon your return. The smart plug can power on and off nearly any electrical device, directly from your phone or your key fob.

Automate

You can easily set up automatic rules for when your electrical devices should turn on and off using the SmartControl feature. Combine the automatic control of your smart plugs with arming and disarming the alarm for a complete autopilot experience.

Smart Plug

Remote control the lights or let the radio turn on and off automatically, to give the impression that your home is occupied even when you're away.

Included

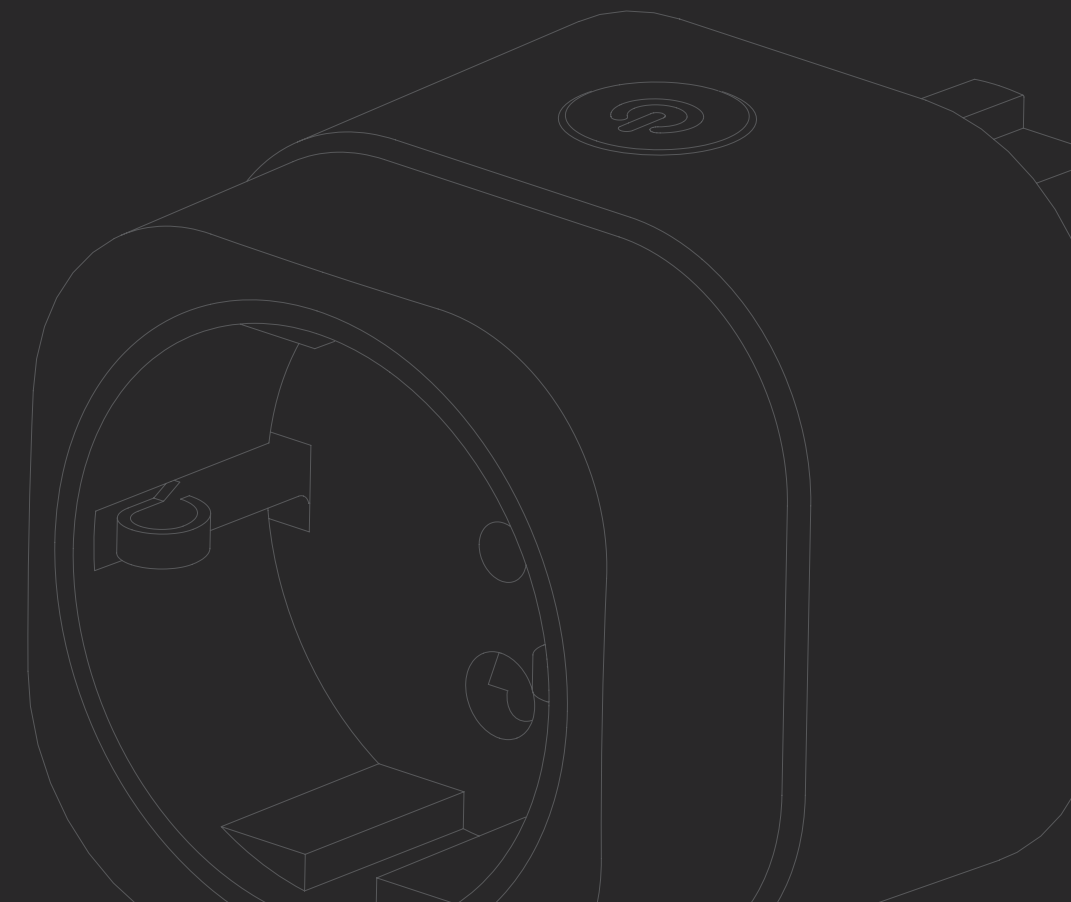

1x Smart plug (EU)

Product IDs

SKU: SFPLG
EAN: 5711826605113

Technical Specifications

Power: EU 2-pin outlet
Input/output: AC 220V-250V/50-60Hz/Max 10A
AC 220V-250V/50-60Hz
Max load: 2200W
Environment: Indoor, -20°C to +50°C, up to 90% relative humidity (non-condensing).
Dimensions: H: 50 mm, W: 50 mm, D: 82 mm
Features: Mobile control of lights and electrical appliances.

Deter, Startle, and Divert

Install the siren anywhere you prefer indoors, as it wirelessly connects to your alarm system. If the alarm is triggered, your system hub will send a wireless signal to the siren to activate its blaring and flashing. This siren is frequently utilized when choosing to conceal the system hub in a closet (while simultaneously deactivating the built-in hub siren).

Effective Alarm

The siren startles and distresses intruders with its powerful 90 dB siren sound when the alarm is triggered. At 90 dB, the sound is loud, akin to a train rushing past. It's not a sound that goes unnoticed or ignored.

Indoor Siren

Deter and startle intruders with this powerful 90dB indoor siren.

Included

1 x Indoor Siren
3 x AA batteries (pre installed)
1 x Screws and wall anchors for installation

Product IDs

SKU: SFISR
EAN: 5711826605120

Technical Specifications

Battery: 3 x AA
Battery life: Up to 24 months
Environment: Indoor, 0°C to +50°C, up to 90% relative humidity (non-condensing).
Dimensions: H: 121 mm, W: 88 mm, D: 38 mm
Volume: 90 dB
Features: Low battery notifications, tamper protection, adjustable status lights, status sounds, volume and duration.

It Packs a Real Punch

The outdoor siren startles and distresses intruders with its powerful 115 dB siren sound and flashing lights when the alarm is triggered.

115 dB is roughly equivalent to the roar of a home crowd cheering for a goal at the football stadium.

The siren is battery-powered, allowing you to mount it wherever you desire on your property. If you prefer a permanent 220V power supply for the siren, it is available as an additional accessory.

Let the Intruder Know You're Secure

The siren is weather-resistant and wirelessly communicates with your alarm system, making it highly suitable for outdoor installation. If the alarm is triggered, your system hub will send a wireless signal to the siren to activate its blaring and flashing.

Outdoor Siren

Extremely powerful 115dB outdoor siren. Mount on the exterior of the house and demonstrate to potential intruders that your home is secured.

Included

1 x Indoor Siren
3 x D batteries (pre installed)
1 x Screws and wall anchors for installation

Product IDs

SKU: SFOSR
EAN: 5711826605137

Technical Specifications

Battery: 3 x D
Battery life: Up to 36 months
Environment: Outdoor, -20°C to +60°C, up to 90% relative humidity (non-condensing).
Dimensions: H: 278 mm, W: 234 mm, D: 75 mm
Volume: 115 dB
Features: Low battery notifications, tamper protection, adjustable status lights, status sounds, volume and duration.

Security Cameras

Indoor and outdoor, keep in the loop
whenever you want, no matter where you are.

Instant Video Documentation

Document events in real time with full HD video and be one step ahead.

Our security camera features

Easy and Quick Installation

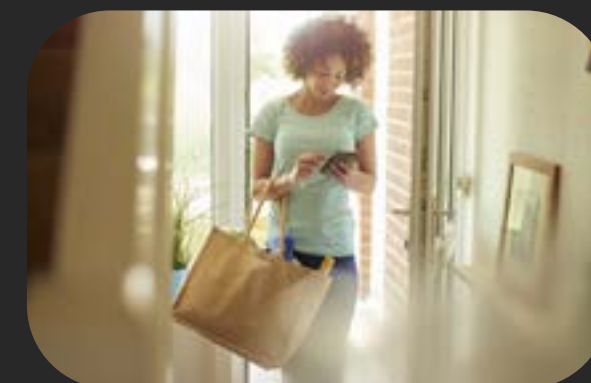

Since the camera is battery-powered and requires no wiring, it's incredibly easy to install almost anywhere.

If you want the camera on a wall, simply screw the magnetic ball mount onto the wall and place the camera on it. On a rail or table, it's even simpler – just attach the camera directly to the ball mount and adjust the direction.

Receive Alerts When It's Truly Relevant

The camera intelligently processes what it sees and notifies you when it's actually relevant. On-device processing significantly reduces false notifications triggered by moving trees, shadows, and more. As a result, you only receive alerts when there's actually something worth noting.

Speak Through the Camera

Have you just received a notification about a delivery person in your driveway? With a single tap, you can speak through the camera directly from your phone and instruct them where to leave the package.

Save Your Recordings

The solar-powered camera is constructed to thrive in outdoor environments. It's designed to meet IP66 standards, making it capable of withstanding dust, dirt, heavy rain, and snow.

Critical Alerts on iOS®

The camera will keep you informed about any events in real-time through notifications on your phone. However, if you have an iPhone®, you can receive critical alerts, ensuring that you'll be alerted even if your phone is set to silent mode.

Works Both Standalone and with Your Alarm System

Use the camera independently or integrate it into your alarm system, so it automatically activates when you leave your home and arm your alarm, and turns off when you're back home.

Online Video Backup

The camera can automatically perform online backups of the recordings it creates. This ensures that your recordings are safe in case the camera is stolen or damaged, allowing you to continue accessing, sharing, and viewing the recordings directly from your phone.

Our Video Cloud service can be easily subscribed to directly in the app and is available for a small monthly fee. The service can be tried for free for 14 days and can be canceled at any time.

Turns On the Light Automatically

When motion is detected in front of the camera during nighttime hours, it automatically activates its powerful built-in spotlights. This ensures sharp and clear video recordings even in low-light conditions.

Made for the Outdoors

The solar-powered camera is constructed to thrive in outdoor environments. It's designed to meet IP66 standards, making it capable of withstanding dust, dirt, heavy rain, and snow.

Outdoor Solar Camera

The solar-powered camera operates directly from the sun's rays. There's no need for cables, charging, or battery replacement.

Included

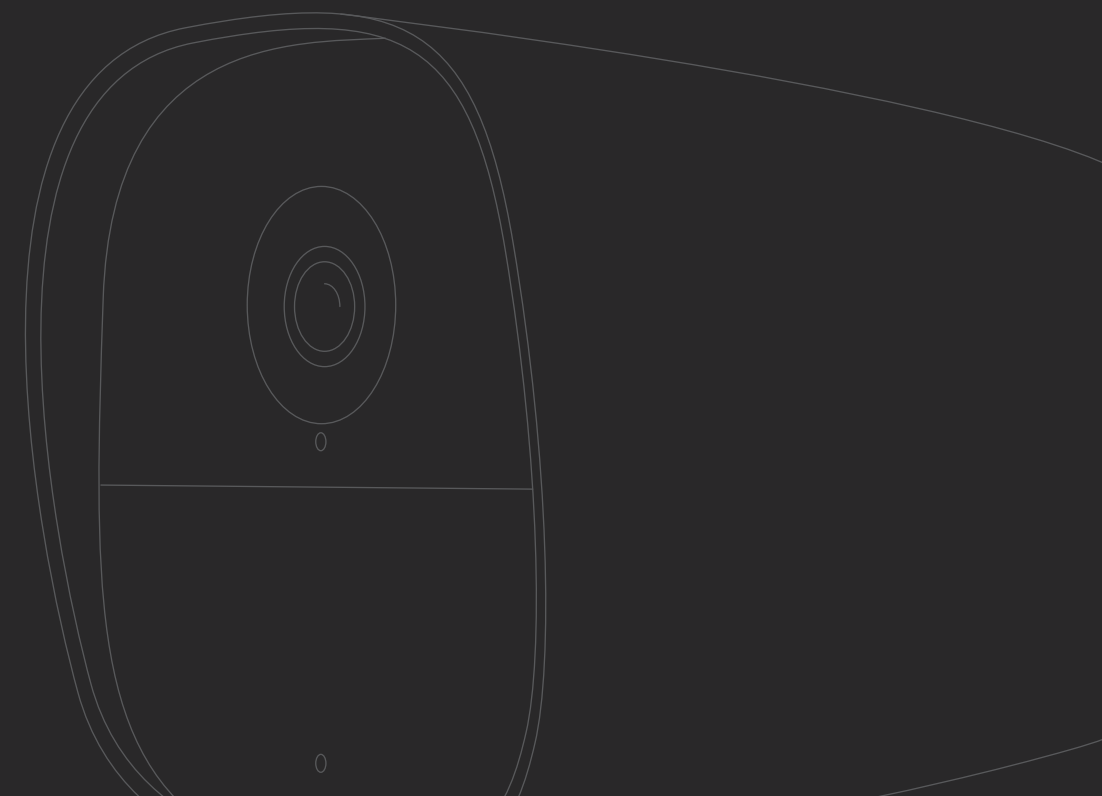

- 1x Solar Camera
- 1x Mounting bracket
- 1x Screws and wall anchors for installation

Product IDs

SKU: SFSCW
EAN: 5711826605144

Technical Specifications

- Power: Built-in 5200 mAh rechargeable battery
USB Type-C charging cable (for initial and manual charging)
- Solar cell: Built-in 1.3W
- Connectivity: WiFi 2.4 GHz 802.11b/g/n
- Environment: Outdoor, -10°C to +55°C, up to 90% relative humidity (non-condensing). IP65.
- Dimensions: H: 141 mm, W: 107 mm
- Camera: Full HD resolution, 135° field of view, 15fps@ 1080px.
- Features: 100% wire free, motion detection, automatic spot lights, microSD™ slot for local video storage, option for cloud video storage.

In/Outdoor Battery Camera

Stay connected whether you're at the office, visiting the in-laws, or on the other side of the world.

Included

- 1 x Battery Camera
- 1 x USB-C charging cable
- 1 x Mounting bracket
- 1 x Screws and wall anchors for installation

Product IDs

White	SKU: SFBCW

Works Both Indoors and Outdoors

The solar-powered camera is constructed to thrive in outdoor environments. It's designed to meet IP66 standards, making it capable of withstanding dust, dirt, heavy rain, and snow.

100% Wire-Free

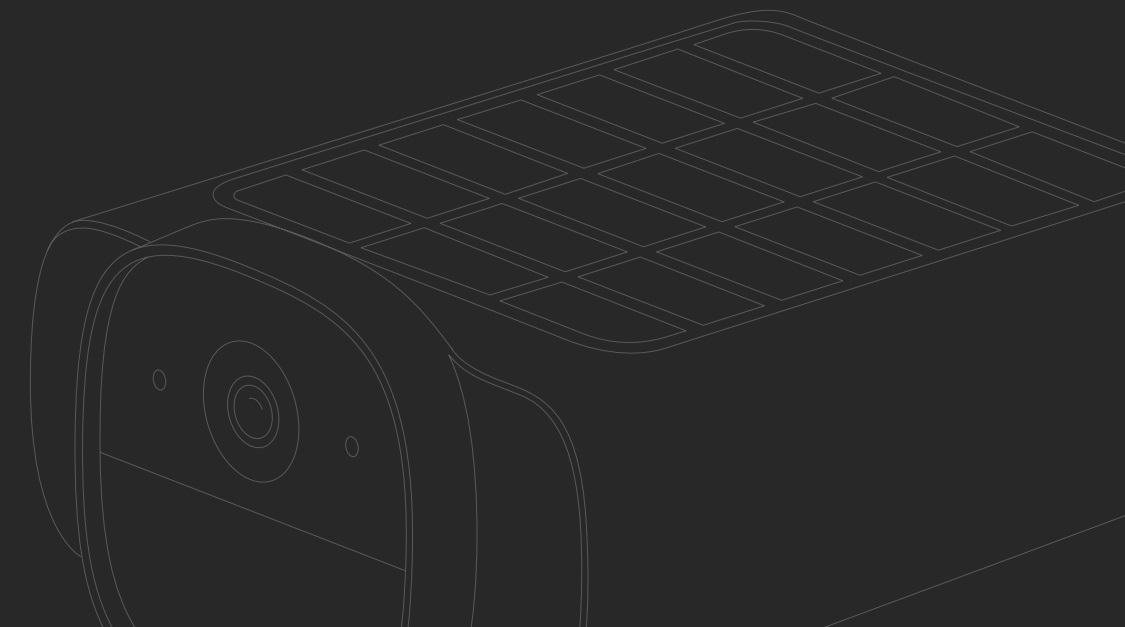

With the wireless battery camera, you can forget about any cable installations. The camera is battery-powered, allowing you to place it precisely where you want without the hassle of wires.

Long Battery Life

Even though charging the battery camera is easy and quick, we understand that you have many other things you'd rather spend your time on. That's why we've done everything to ensure the longest possible battery life for the camera. Therefore, you only need to charge your camera approximately 2 times a year¹.

¹ Battery life of up to 6 months is based on up to 5 daily activations. Battery life may vary based on usage patterns, installation area, etc.

Partner up with us

Combining your expertise and customer network with our certified professional security hardware creates significant opportunities and contributes to building safer communities.

Why partnering with us?

At Safetify, we take pride in developing, manufacturing, and distributing cutting-edge, certified professional security systems that set industry standards. Partnering with us means gaining access to a world of innovation and reliability.

Our commitment to excellence ensures that your customers will receive top-tier security solutions, bolstering their confidence in your offerings. Together, we can forge a strong alliance to enhance security, protect assets, and create safer environments. Join us in our mission to provide peace of mind through advanced security technology.

Installer focussed in both design and operation

At Safetify, we prioritize the installer's experience in every aspect of our business. We understand that seamless installations are crucial, which is why we've engineered our security systems to be not only state-of-the-art but also exceptionally easy and fast to install.

Our installer-friendly solutions empower you to provide swift and efficient services to your clients. What sets us apart is our commitment to simplifying every step of the process, from initial setup to managing existing installations through our user-friendly app.

Beyond installation, our dedication to customer satisfaction extends to our comprehensive aftersales service and support. We're here to ensure that you and your clients have the peace of mind that comes with knowing we're with you every step of the way, making security solutions accessible and hassle-free.
