SikkertHjem™ was founded back in 2008, in an attempt to do away with the prices and cumbersome procedures the alarm industry was (and still is) characterized by.

Largest in Scandinavia

SikkerHjem™ secures more than a thousand new homes every month in the Danish market alone, making us the largest self-installation alarm company in Scandinavia.

A status we take very seriously and which is the result of our constant focus on good and solid hardware, backed by serious and responsive customer service and support.

S6evo™

Alarmsystem, sensors & accessories

S6evo™ brings the classic security system to a new level. With S6evo™ you add smart home features that give you control over your home.

Connected to the internet, everything happens in real time and everything syncs across all users' smartphones. All for free.

Full control. Home & abroad.

The S6evo™ offers SMS backup, which automatically takes over in the event of an internet connection failure.

The SMS function also allows you to receive notifications from S6evo™ even when you are abroad and have chosen to turn off mobile data on your mobile phone.

SMS backup is not required to use the S6evo™ system, but strongly recommended.

Quick setup. Easy to use.

Ease of use is part of the S6evo™ system's DNA. This is also reflected in the way new sensors & accessories are connected to the system.

New sensors & accessories are connected quickly and easily by simply scanning the QR code with your mobile phone and naming it. The intuitive S6evo™ app guides you.

With S6evo™ you avoid the monthly subscription, call-out charges and additional fees.

Once you've bought and paid for your S6evo™ system, it's yours and you don't have to pay for the system to work.

Customize. Expand. You decide.

The S6evo™ system is sold in different packages. The alarm system is exactly the same, but each package contains a different number of sensors and accessories.

No matter which package you have purchased, you can always customise and expand your S6evo™ system with a wide range of sensors and accessories, each adding new features to your system

With S6evo™, you have the freedom to expand your alarm system with our accessories that are easily added in the app on your mobile.

S6evo App

The S6evo™ app is your complete control centre directly on your phone, allowing you to operate your S6evo™ alarm system and connected products with just one tap.

It's also right here in the app that you easily set up and customize your system to work exactly the way you want it to.

Download for Iphone

Download for Android

S7pro™

Alarm system & accessories

For those who want the most function & customization options. In the latest series from SikkertHjem we have rethought design, functions and our alarm system in the best way.

Rethinking design & features

We've rethought design, features and our alarm system in the best way. In the S7pro™ series of alarm packages and surveillance cameras, we can introduce sensor live status, mobile back-up, light control, wireless installation, solar camera, and much more.

Integrated monitoring. quick setup

S7pro offers deep integration with our battery and solar cameras. Easily access your surveillance cameras directly from the app's front page and if you have more than one camera, you can even group up to four on one screen for a total overview.

Through the app, you can easily operate your cameras customise settings.

Subscription free

Like our other systems, S7pro™ is a subscription-free alarm system.

You are not charged any monthly payments or fees.

Unlimited amount of users

You can add as many users to your S7pro™ system as you like.

If you have a SIM card installed, you can also choose whether a user should receive notifications such as push messages, SMS messages or both.

Surveillance

Integrated & Stand-Alone

Easily access your surveillance cameras directly from the app's front page and if you have more than one camera, you can even group up to four on one screen for a total overview.

Through the app, you can easily operate your cameras customise settings.

The camera is battery-powered and therefore does not need any kind of cabling, it is incredibly easy to install.

100% wire-free

With the new wireless battery camera, you don't have to worry about wiring of any kind. The camera is battery-powered and can therefore be placed exactly where you want it.

Looooong Battery life

While charging your battery camera is quick and easy, we know you have a lot of other things you'd rather be doing. That's why we've gone to great lengths to ensure the longest possible battery life for your camera. That's why you only need to charge your camera about twice a year¹.

Batterikamera
Black

Batterikamera
White

64 GB microSD™
For mobile storage

¹ Battery life of up to 6 months is based on up to 5 daily activations. Battery life may vary based on usage pattern, installation area, etc.

CROSS
PLATFORM

Works both alone and with your alarm system

Use the camera alone or integrate it into your SikkertHjem alarm system so it automatically turns on when you leave your home and turns your alarm on and off again when you're home.

Use the camera alone or integrate it into your SikkertHjem alarm system so it automatically turns on when you leave your home and turns your alarm on and off again when you're home.

No wires No charging

With the solar camera, wires and charging does no longer exist. Once you've hung the camera in a sunny spot, it charges itself without you having to do anything.

Of course, for the first charge or if you've had the camera stored away for a while, you can also charge the camera manually via USB-C.

Lights on automatically

When it's dark, and motion is detected in front of the camera, it automatically turns on its powerful built-in spotlights. This ensures sharp and clear video footage, even at night.

CROSS
PLATFORM

Get notified when it is relevant

The camera intelligently processes what it sees and lets you know when it's actually relevant. On-device processing drastically reduces false notifications, triggered by trees moving in the wind, shadows, etc.

You are therefore only notified when there is actually something to see.

Solar Camara

Power supply: 5200 mAh rechargeable battery
5V 2A USB Type-C

Solar cell: built-in solar panel 1.3W Max

Connectivity: WiFi 2.4 GHz 802.11b/g/n

S7pro App

The S7pro™ app gives you complete control over your stand-alone camera.

You set up and operate your camera easily and securely with your phone. You can view your cameras in multiview and control access to your camera as well as much much more. All secure, fast, simple and in real time.

Share your S7pro™ system with friends and family and let them monitor your home while you're out. Easily assign them different access levels and decide which notifications they should receive.

Download for Iphone

Download for Android

Stand-alone or integration

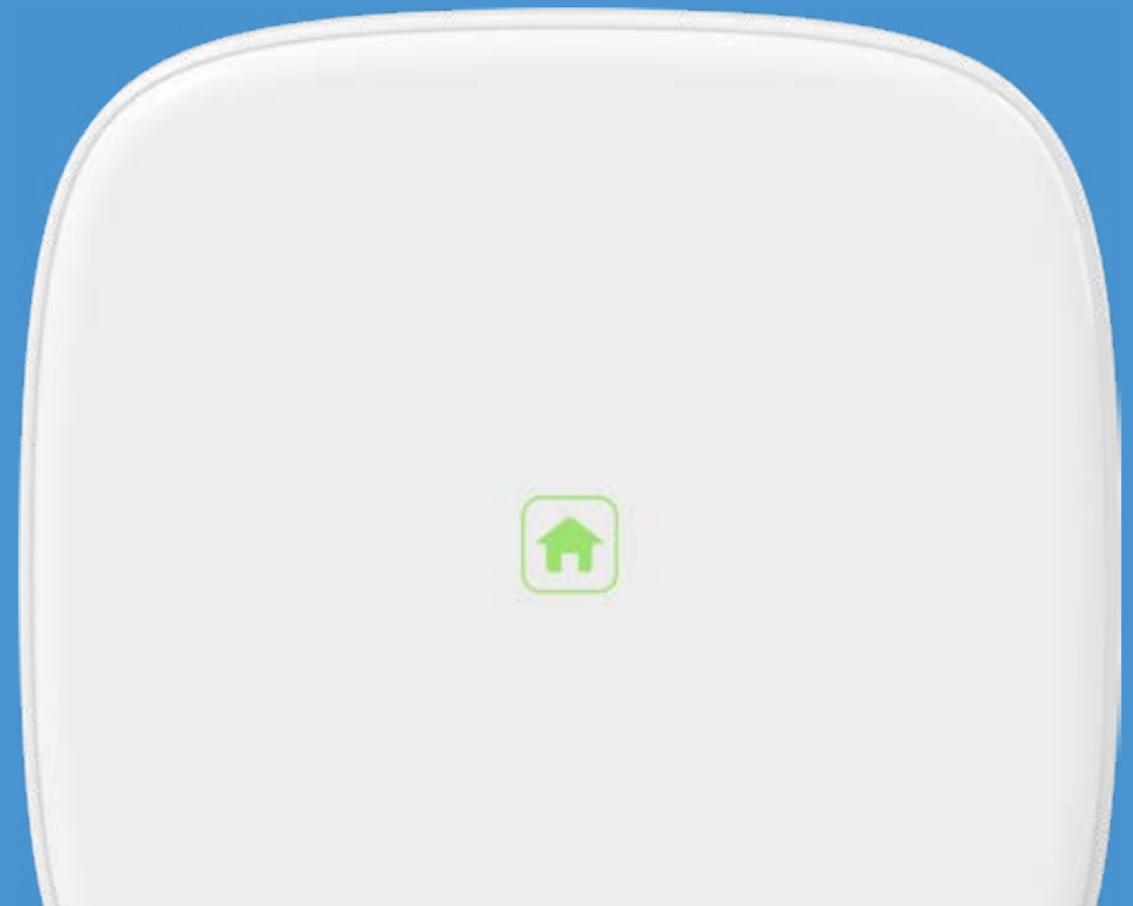

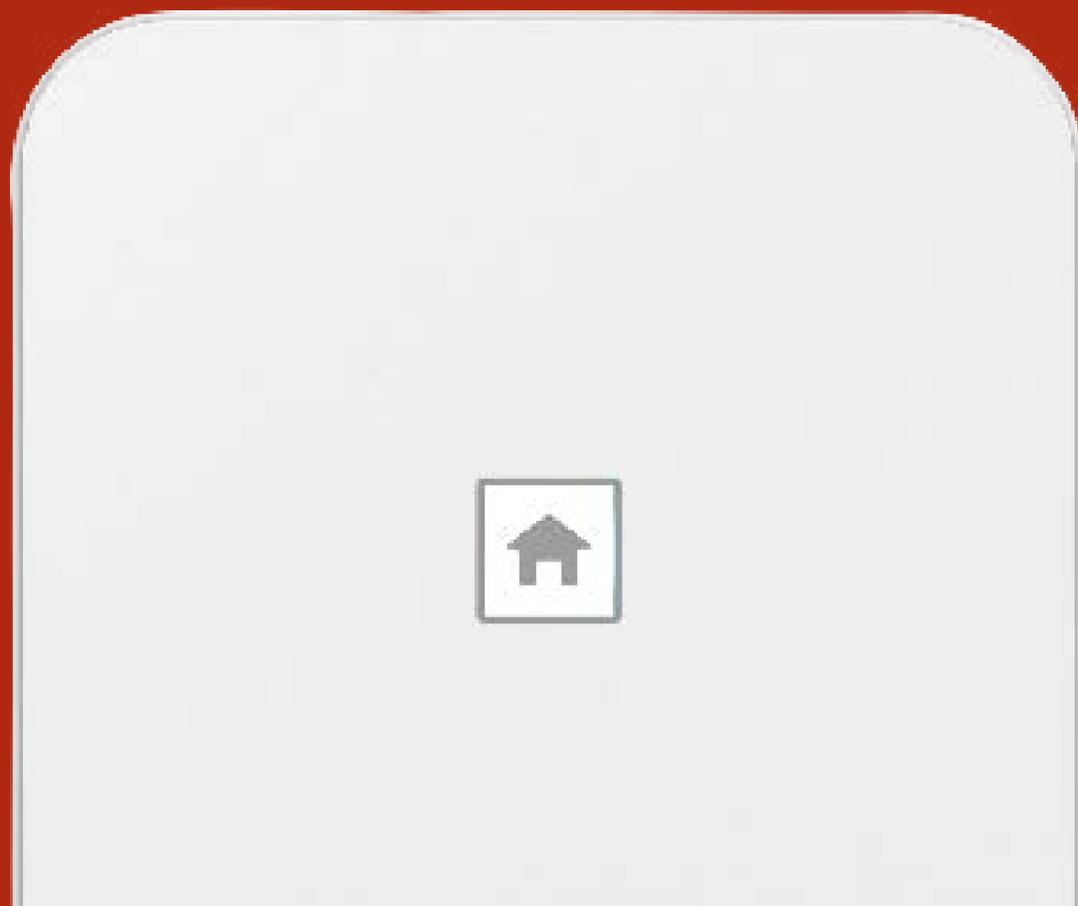

You can operate your solar and battery camera as stand-alone in the app but also integrate them with both your S7pro™ and S6evo™ alarm system.

If you have an S6evo™ alarm system, you should enter your cameras into the S6evo app. So, you have full control and operate the alarm system and monitoring from one app.

Comparison

The small details make a big difference

SikkertHjem™ offers two alarm systems, S6evo™ and S7pro™. Get a comprehensive overview of features and control. Compare features and system to find the right solution for you.

Functionality:
